WHY CISM

More than a badge on LinkedIn

CISM tells employers you can connect security operations with business goals — the kind of thinking that lands leadership roles.

Security Governance

Build and run governance frameworks that serve the business — not just tick compliance boxes.

Risk Management

Identify, measure and prioritise security risks for informed C-suite conversations.

Security Programme

Design and run a security programme end-to-end — from writing policies to daily operations.

Incident Management

Build a capability that can detect, contain and recover from security incidents quickly.

Better Salary & Roles

CISM-certified professionals consistently earn more — one of the highest-paying security certifications worldwide.

Bridge Tech & Business

Most security pros are strong technically but struggle to talk to stakeholders. CISM closes that gap.

WHAT YOU MASTER

Four domains. One exam.

The CISM exam weighting — so you know where to focus.

03 **Information Security Programme** ~26%

WHAT STUDENTS SAY

First-attempt passes, in their words

★★★★★

"I was juggling a full-time job and CISM prep, and the structured daily schedule made it manageable. Passed on my first attempt with a comfortable margin. The mock exams were the closest thing to the real deal."

AR

Aditya R.
Security Manager, IT Services · Bengaluru

★★★★★

"The difference between this and self-study is night and day. Having someone explain governance concepts with actual examples from enterprise security made everything click."

PS

Priya S.

★★★★★

"I'd failed CISM once before with self-study. Joined Cybernous, and the doubt-clearing sessions alone were worth it. They helped me understand how ISACA frames questions."
