

CompTIA Security +

THE HANDS-ON BASELINE
WITH THE LABS IN THE ROOM

Security+ assumes you can **do** things, not just define them — up to 90 questions in 90 minutes, PBQs first. This course puts the simulations in the room.

40 hours, coached live

Weighted to the five SY0-701 domains

Timed 90-question mocks

Beat the clock before exam day, not on it

Ports • protocols • acronyms clinic

A system for the wall of Security+ jargon

TO PASS

The clock and the sims — not the **theory**.

Most failures share one shape: the performance-based questions at the start eat twenty minutes, the remaining questions get rushed, and the score lands in the 600s. The theory was known. **The pace was not practised.**

CC ASKS

“What is a firewall?”

A knowledge-and-vocabulary exam. Define it and move on.

SECURITY+ ASKS

“Fix this rule set.”

A hands-on exam. It puts a console in front of you and grades what you do.

CompTIA recommends Network+ and two years of experience — a bar most candidates in India and the Gulf don't meet. That's not a reason to skip it; it's a reason to prepare differently — with structured coaching and timed practice.

The baseline job descriptions name first.

CompTIA Security+ is the vendor-neutral baseline — hands-on, DoD 8140-approved, recognised worldwide as the standard first security certification.

FOUR STEPS FROM ENROL TO CERTIFIED

01**Prepare**

40 hours live-coached, weighted to the five domains.

02**Pass**

Score 750 / 900 across MCQs and PBQs.

03**Certified**

Valid for three years from your pass date.

04**Renew**

50 CEUs, or pass a higher CompTIA cert.

TAKE SY0-701 NOW — DON'T WAIT FOR SY0-801

SY0-701 is bookable until **11 June 2027 (English). Your certification is valid three years from your pass date — employers do not distinguish versions.**

An AI-focused successor is expected late 2026, but there's nothing to wait for — SY0-701 keeps running until its published retirement.
